Owners of the Property Announces Their Intention to Reopen and Work the Mine—Valuable Marble Found Near Milford—Sale of the Winnamuck—Mining Notes.

About ten days ago the owners of the old Yosemite mine, at Bingham, consented to the bonding of the property to eastern people by A. Hanneur, one of their immber, for a consideration said to be \$190,000. The first payment—\$15,000—was to have been made on Monday, but connections were not made, and recently and will prove very valuable, as the freight rates on Vermont and Italian marble are something outrageous.

as if they would kill the goose that lays the golden egg. No difficulty would have been experienced in making contracts with a number of mines near Eureka, if Mr. Peyton could have purchased the ores at prices based on the former freight charges, but the increase makes it extremely difficult in many instances, if not, in fact, impossible. The change from a minimum to a maximum capacity of freight cars is another detrimental feature. In fact, the general view taken by Mr. Peyton is that the railroad companies are standing in their own light, because if his mill is obliged to remain idle on account of a failure to procure ample ore, directly attributable to the excessive freight charges, the railways will be the greater losers. As Mr. Peyton remarked, "The railroads get the big end of the pronosition. They haul in the crude ores, and haul out the mill product. We are compelled to use a great many cars of coal, sait and blue rock, besides an innumerable lot of necessary requirements; but if they insist on making the rates prohibitory, I may be forced to go back to the old days of teaming from Eureka." Discovered By a Woman.

Another great discovery has been made, and that, too, by a lady in this country; "Disease fastened its clutches upon her and for seven years she with stoed his severest tests, but her vital organs were undermined and her death seemed imminent. For three months she coughed incessantly and could not sleep. She finally discovered a way to recovery, by purchasing of us a bottle of Dr. King's New Discovery for Consumption, and was so much relieved on taking the first dose, that she slept all night, and with two bottles has been absolutely cured. Her name is Mrs. Luther Lutz." Thus writes W. C. Hamnick & Co., of Shelby, N. C. Trial bottles free at Z. C. M. I. drug department. Regular size, 50c and \$1.00. Every bottle guaranteed. The morning call on the Salt Lake exchange was a quiet one compared to the scenes of Monday. Manhattan took a spurt and it was all that saved the exchange from being out-done by the Utah board in the afternoon, at least in the number of shares trans-

Daly-West came near reaching the \$19 mark; toward the close it went up to \$3.89 a share and sold at that figure.
Daisy remained firm and sold as high as \$2½. Northern Light sold at \$73 and 100 shares of Mammoth was knocked down at \$1.88. Considerable bidding was done for Eagle, but the stock stiffened up and only 1.000 shares could be gotten, and that went for 10 cents.

Joe Bowers caused lots of activity and 15 cents was offered by probably a dozen different brokers. Five thousand shares were secured at that price, and another 1.000 shares went at an increase of an eighth of a cent.

On the Utah exchange the trading was confined principally to the low-priced stocks. International created some stir and \$5.500 sold at \$3% cents.

Antler was again a favorite and 6,000 shares in all were bid in. Dexter was strong and 200 shares went at \$2.56. Tankee Consolidated was also in demand and 2,000 shares went at \$2.56. The Ute Reservation Attracting

The Ute Reservation Attracting Many Home-seekers.

Durango, Colo., May 2-Register Chipley of the state board of land commissioners arrived here this morning, for the purpose of making a filing, on behalf of the state, on sections is and 26 of each township in the Ute reservation, which are claimed by the state under the school land grant. This filing is made with a view to a contest. Land Commissioner Hermann having directed the land office of the sections in dispote which aggregate over 26,000 acres. While prospective settiers are roaming over the reservation, picking out the best lands, mest of the Utes are sulfiely removing their tepees west to their new reservation. A few of the Utes will remain on their allotments, which have been shrewdly chosen along the waier-course, but most of the Indians will dispose of their property under lease at once, after the improvident manner of their race, and will join their felows in the west.
